// 01 Profile

Software engineer with **5+ years** of experience shipping digital products across satellite telecommunications, POS, CRM, and internal platforms. Specialized in **React**, **Next.js**, **Vue.js**, and **Flutter** — currently focused on full-stack Dart (Flutter + Frog + PostgreSQL). Led UI/UX development of the Network Monitoring System dashboard used daily by the **BAKTI KOMINFO** team running the SATRIA-1 satellite HUB.

// 02 Experience

PT. BIS DATA INDONESIA

08/2023 – Present

Front End Developer

Jakarta, Indonesia

- **NADIA** — NMS for SATRIA-1 Satellite HUB (BAKTI KOMINFO, Jayapura): mobile & web monitoring, integrated FORTIGATE, HUAWEI Core Switch, HPE ProLiant.
- **VIONA** — Multi-HUB NMS (Jayapura, Manokwari, Timika): unified topology, alert routing, device status across 3 regions.
- **LOOKUP MY IP** internal monitoring tool: built an application to track detailed device IP, geolocation, and network data; maintained AWS, weekly progress reports to BAKTI KOMINFO.
- **ARTZ HR** — end-to-end HR platform (attendance, payroll, leave, directory) with RBAC, audit logs, Flutter mobile + web client.
- **BDI Chat** — real-time messaging (channels, DMs, file sharing) over WebSocket with PostgreSQL full-text search & offline cache.

PT. Life Tech Tanpa Batas

08/2021 – 08/2023

Front End Developer

Bandung, Indonesia

- **BeetPOS & BeetClinic** — designed UI/UX, built back-office, integrated Tokopedia, Shopee & QRIS; fixed payment-method bugs.
- **CRM MRT** — designed and developed the CRM, payment integration, role-based dashboards, customer activity timeline.
- Code reviews, staging/production deployments, cross-functional collaboration.
